#### INDEPENDENT AUDITORS' REPORT

Board of Directors Great American Bancorp, Inc. Champaign, Illinois

#### **Report on the Consolidated Financial Statements**

We have audited the accompanying consolidated financial statements of Great American Bancorp, Inc. and Subsidiary (Company), which comprise the consolidated balance sheets as of December 31, 2019 and 2018, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

#### Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Great American Bancorp, Inc. and Subsidiary as of December 31, 2019 and 2018, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

# **GREAT AMERICAN BANCORP, INC. AND SUBSIDIARY** Notes to Consolidated Financial Statements December 31, 2019 and 2018

(Table dollar amounts in thousands, except share data)

#### Note 1: Nature of Operations and Summary of Significant Accounting Policies

#### Principles of Consolidation

The consolidated financial statements include the accounts of Great American Bancorp, Inc. (the "Company") and First Federal Savings Bank of Champaign-Urbana, (the "Bank"), and the Bank's wholly-owned subsidiary, Park Avenue Service Corporation ("PASC"). All significant intercompany balances and transactions have been eliminated in consolidation.

#### Nature of Operations

The Company is a thrift holding company whose principal activity is the ownership and management of its wholly-owned subsidiary, the Bank. The Bank is primarily engaged in providing a full range of banking and financial services to individual and corporate customers in Champaign County, Illinois. The Bank also provides full service brokerage activities through a third-party broker-dealer and engages in the sale of tax deferred annuities. The revenue generated from brokerage services is dependent upon maintaining relationships with the current brokerage providers. The Company and Bank are subject to competition from other financial institutions. The Company and Bank are subject to the regulation of certain federal agencies and undergo periodic examinations by those regulatory authorities.

The Bank's subsidiary, PASC, offers insurance services to customers located primarily in Illinois. GTPS Insurance Agency, (the "Agency") a division of PASC, sells a variety of insurance products to both individuals and businesses, including life, health, auto, property and casualty insurance. The revenue generated by PASC is dependent upon maintaining relationships with the current insurance providers.

#### Use of Estimates

In preparing consolidated financial statements in conformity with generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change in the near term include the determination of the allowance for loan losses, other real estate owned, postretirement benefits, and fair values of financial instruments.

#### Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents include amounts due from correspondent banks, cash on hand, balances of interest bearing demand deposits, federal funds sold, and Federal Home Loan Bank term deposits that mature within three months or less from purchase.

#### Securities

Securities that management has the positive intent and ability to hold to maturity are classified as "held to maturity" and recorded at amortized cost. Securities not classified as held to maturity are classified as "available for sale" and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income (loss).

Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Declines in the fair value of held to maturity and available for sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. In estimating other than temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) whether management has the intent to sell the security and if it's *not* "more likely than not" that management will have to sell the security before recovery of its amortized cost basis. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

#### Federal Home Loan Bank Stock

Federal Home Loan Bank stock is a required investment for institutions that are members of the Federal Home Loan Bank of Chicago. The required investment in the common stock is based on a predetermined formula. This investment is accounted for at cost and is periodically assessed for impairment.

#### Loans Held for Sale

Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or fair value, as determined by aggregate outstanding commitments from investors or current investor yield requirements. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income.

Mortgage loans held for sale are generally sold with the mortgage servicing rights retained by the Company. The carrying value of mortgage loans sold is reduced by the cost allocated to the associated mortgage servicing rights. Gains or losses on sales of mortgage loans are recognized based on the difference between the selling price and the carrying value of the related mortgage loans sold.

#### Loans

The Company grants mortgage, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by mortgage loans in Champaign County, Illinois. The ability of the Company's debtors to honor their contracts is dependent upon the real estate and general economic conditions in this area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff generally are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method over the contractual life of the loan.

The accrual of interest on mortgage and commercial loans is discontinued, and the loan is placed on non-accrual status at the time the loan is 90 days past due unless the credit is well-secured and in process of collection. Consumer loans are typically charged off no later than 180 days past due. Past due status is based on contractual terms of the loan. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

Loans for which the terms have been modified as a result of the borrower's financial difficulties are considered troubled debt restructurings ("TDRs") and are classified as impaired loans. TDRs are measured for impairment based upon the present value of estimated future cash flows using the loan's existing rate at inception of the loan or the appraised value if the loan is collateral dependent.

All interest accrued but not collected for loans that are placed on non-accrual or charged off is reversed against interest income. Interest received on such loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual status. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

#### Allowance for Loan Losses

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to income. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. When establishing the allowance for loan losses, management categorizes loans into risk categories generally based on the nature of the collateral and the basis of repayment. These risk categories and the relevant risk characteristics are as follows:

First mortgage loans

- 1-4 family residential real estate loans include loans to borrowers where the underlying collateral is the borrower's primary residence ("owner-occupied loans") and loans to borrowers where the property securing the loan is normally leased to an unrelated third party ("non-owner-occupied loans"). Owner-occupied 1-4 family residential mortgage loans generally carry less risk than other loan types as they tend to be smaller balance loans without concentrations to a single borrower or group of borrowers. Repayment depends on the individual borrower's capacity. Non-owner-occupied loans have a greater credit risk than owner-occupied loans because a borrower might have multiple non-owner-occupied loans outstanding. The repayment of non-owner-occupied loans is also dependent on the borrower's ability to lease the properties, collect sufficient rents, and provide adequate maintenance of the properties. A deterioration in the market value of residential real estate could result in a greater risk of loss if actions such as foreclosure become necessary to collect the loan.
- Secured by other properties are generally loans secured by multi-family residential real estate, commercial properties or land. Multi-family real estate loans generally involve a greater degree of credit risk than 1-4 family residential mortgage loans due to the dependence on the successful operation of the project. Commercial real estate loans also generally have greater credit risks compared to 1-4 family residential real estate loans, as they usually involve larger loan balances secured by non-homogeneous or specific use properties. Repayment of both multi-family and commercial real estate loans typically rely on the successful operation of a business or the generation of lease income by the property and is therefore more sensitive to adverse conditions in the economy and real estate market. Loans secured by land are at greater risk than residential 1-4 family home loans due to the lack of cash flow and the reliance on the borrower's capacity for repayment.
- Construction loans, including 1-4 family, multi-family and commercial construction loans, generally have a greater credit risk than traditional 1-4 family residential real estate loans. The repayment of these loans can be dependent on the sale of the property to third parties or the successful completion of the improvements by the builder for the end user. In the event a loan is made on property that is not yet approved for the planned development, there is the risk that approvals will not be granted or will be delayed. Construction loans also run the risk that improvements will not be completed on time or in accordance with specifications and projected costs.

#### Other loans

- Commercial loans are secured by business assets or may be unsecured and repayment is directly dependent on the successful operation of the borrower's business and the borrower's ability to convert the assets to operating revenue and possess greater risk than most other types of loans should the repayment capacity of the borrower not be adequate.
- Consumer loans include home equity loans, auto and mobile home loans, and other secured and unsecured loans and lines of credit. Home equity loans are similar to 1-4 family owner-occupied residential loans and carry less risk than other loan types as they tend to be smaller balance loans without concentrations to a single borrower or group of borrowers. Auto loans and mobile home loans tend to be secured by depreciating collateral. Consumer loan collections are dependent on the borrower's continuing financial stability, and are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy.

The allowance consists of specific and general components. The specific component relates to loans that, based on payment status, collateral value and other current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. These loans are classified as impaired loans and the Company establishes a specific allowance when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Impairment is measured on a loan by loan basis for 1-4 family non-owner-occupied residential real estate loans, mortgage loans secured by other properties, construction loans and commercial loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogenous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual consumer and 1-4 family owner-occupied residential mortgage loans for impairment, unless such loans are the subject of a restructuring agreement.

The general component of the allowance covers unimpaired loans and is based on historical loss experience adjusted for qualitative factors. The loan portfolio is stratified into homogeneous groups of loans based on the risk categories as previously described and an appropriate loss ratio adjusted for other qualitative factors is applied to each group of loans to estimate the incurred losses in the portfolio. The other qualitative factors considered by management include, but are not limited to, the following:

- Changes in loan policy or procedures
- Economic trends, both local and national
- Volume trends
- Management and staff of the Bank
- Non-performing and problem loan asset levels and trends
- Concentrations of credit
- External factors such as local competition and banking regulations
- Potential unidentified factors

Loans are charged off against the allowance for loan loss account when the following conditions are met:

- 1-4 family residential owner-occupied real estate loans are charged down by the expected loss amount at the time they become non-performing, which is generally 90 days past due.
- Loans secured by 1-4 family non-owner-occupied real estate loans, mortgage loans secured by other properties, and construction loans typically have reserves established once a loan is classified as substandard unless the collateral is adequate to cover the balance of the loan plus selling costs. Generally, the specific reserve on a loan will be charged off once the property has been foreclosed and title to the property has been transferred to the Bank.
- Commercial loans secured by business assets, including inventory and receivables will typically have specific reserves established once a loan is classified as substandard. The specific reserve will be charged off once the outcomes of attempts to legally collect the collateral are known and have been exhausted.
- Consumer loans are charged-off, net of expected recovery when the loan becomes significantly past due over a range of up to 180 days, depending on the type of loan. Loans with non-real estate collateral are written down to the value of the collateral, less costs to sell, when repossession of the collateral has occurred.

#### Servicing

Servicing assets are recognized as separate assets when rights are acquired through the sale of financial assets. For sales of mortgage loans, a portion of the cost of originating the loan is allocated to the servicing right based on relative fair value. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. Capitalized servicing rights are reported in other assets and are amortized into noninterest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets.

Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights into tranches based on predominant risk characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that fair value is less than the capitalized amount for the tranche. If the Company later determines that all or a portion of the impairment no longer exists for a particular tranche, a reduction of the allowance may be recorded as an increase to income.

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal; or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is included as an offset to noninterest income.

#### **Off-Balance Sheet Credit Related Financial Instruments**

In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under credit card arrangements, commercial letters of credit, and standby letters of credit. Such financial instruments are recorded when they are funded.

#### Premises and Equipment

Land is carried at cost. Buildings and equipment are stated at cost less accumulated depreciation computed on the straight-line method over the estimated useful lives of the assets. Leasehold improvements are capitalized and depreciated using the straight-line method over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. Estimated lives are thirty-nine years for building and improvements, fifteen years to twenty-five years for leasehold improvements, and three years to seven years for furniture and equipment.

#### Impairment of Long-Lived Assets

The Company tests long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of carrying amount or fair value less estimated costs to sell.

#### Goodwill

The excess of cost over the fair value of assets acquired for transactions accounted for as a purchase is recorded as an asset by the Company. On a periodic basis, the Company reviews the goodwill for events or circumstances that may indicate a change in recoverability of the underlying basis. Management performs the annual impairment test on June 30<sup>th</sup>.

#### Other Real Estate Owned

Real estate properties and other loan collateral acquired through, or in lieu of, loan foreclosure are initially recorded at fair value, less costs to sell at the date of foreclosure, establishing a new cost basis. After acquisition, valuations are periodically performed by management and the real estate and other loan collateral is carried at the lower of carrying amount or fair value less cost to sell. Costs relating to the improvement of the property are capitalized. Subsequent write-downs estimated on the later valuations, gains or losses on sales, and revenue and expenses from operations are included in other real estate expenses on the income statement. The amount of residential real estate included in other real estate owned totaled \$295,000 at December 31, 2019 and \$582,000 at December 31, 2018. Loans secured by residential properties that were in the process of foreclosure totaled \$3,200,000 and \$160,000 at December 31, 2019 and 2018, respectfully.

#### Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

These calculations are based on many complex factors including estimates of the timing of reversals of temporary differences, the interpretation of federal and state income tax laws, and a determination of the differences between the tax and the financial reporting basis of assets and liabilities. Actual results could differ significantly from the estimates and interpretations used in determining the current and deferred income tax assets and liabilities.

Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is "more likely than not" that the deferred tax asset will not be realized. The determination of the realizability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, the forecasts of future income, applicable tax planning strategies, and assessments of the current and future economic and business conditions.

The Company follows the provisions of Accounting for Uncertainty in Income Taxes. These rules establish a standard for tax benefits to meet before they can be recognized in a company's financial statements. The Company can recognize in financial statements the impact of a tax position taken, or expected to be taken, if it is more likely than not that the position will be sustained on audit based on the technical merit of the position. See Note 9, Income Taxes, for additional disclosures. The Company recognizes both interest and penalties as components of other operating expenses.

The amount of the uncertain tax position was not determined to be material. It is not expected that the unrecognized tax benefit will be material within the next 12 months. The Company did not recognize any interest or penalties in 2019 or 2018.

The Company files consolidated federal and state income tax returns and it is not subject to federal or state income tax examinations for taxable years prior to December 31, 2016.

#### Insurance Sales Commissions

Insurance sales commissions are recognized at the time payment is received from customers billed directly by the Agency, net of an allowance for estimated policy cancellations. Contingent commissions and commissions on premiums billed directly by insurance companies are recorded at the time these commissions are received by the Agency. A contingent commission is a commission paid by an insurance company that is based on the overall profit and/or volume of business placed with that insurance company. Commissions on premiums billed by insurance companies primarily relate to a large number of small premium transactions, whereby the billing and policy insurance process is controlled entirely by the insurance company. The income effects of subsequent premium adjustments are recorded when the adjustments become known.

#### Customer service fees

Customer service fees represent fees from its deposit customers for transaction based, account maintenance, and overdraft services. Transaction based fees, which included services such as statement rendering, are recognized at the time the transaction is executed. Account maintenance fees, which relate primarily to monthly maintenance, are earned over the course of a month, representing the period over which the Company satisfies the performance obligation. Overdraft fees are recognized at the point in time that the overdraft occurs as this corresponds with the Company's performance obligation. Payment for such performance obligations are generally received at the time the performance obligations are satisfied.

#### Other service charges and fees

Other service charges and fees represent ATM use fees, wire transfer fees, debit card income, and safe deposit rental income. Revenue is recognized at the point in time when the transaction occurs. Payment for such performance obligations are generally received at the time the performance obligations are satisfied.

#### Treasury Stock

Treasury stock is stated at cost. Cost of treasury shares sold is determined by the first-in, firstout method.

#### Earnings Per Share

Basic earnings per share represents income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. The Company had no dilutive shares.

Earnings per common share have been computed based on the following:

	December 31,					
	2019	2018				
Net income applicable to common stock	\$ 1,468	\$ 955				
Average number of common shares outstanding	428,468	436,085				

#### Transfers of Financial Assets and Participating Interests

Transfers of an entire financial asset or a participating interest in an entire financial asset are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

The transfer of a participating interest in an entire financial asset must also meet the definition of a participating interest. A participating interest in a financial asset has all of the following characteristics: (1) from the date of transfer, it must represent a proportionate (pro rata) ownership interest in the financial asset, (2) from the date of transfer, all cash flows received, except any cash flows allocated as any compensation for servicing or other services performed, must be divided proportionately among participating interest holders in the amount equal to their share ownership, (3) the rights of each participating interest holder must have the same priority, (4) no party has the right to pledge or exchange the entire financial asset unless all participating interest holders agree to do so.

#### Advertising Costs

Advertising costs are expensed as incurred.

#### Comprehensive Income

Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on securities available for sale and unrecognized postretirement obligation, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

#### Subsequent Events

The Company has evaluated subsequent events through March 4, 2020, the date on which the consolidated financial statements were available to be issued.

#### Adoption of New Accounting Standards

In August 2018, the Financial Accounting Standards Board ("FASB") approved Accounting Standards Update ("ASU") 2018-14, Compensation-Retirement Benefits-Defined Benefit Plans: Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans. This guidance removes, modifies, and adds certain disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. The Company early adopted this guidance. The guidance has no impact on the Company's Consolidated Financial Statements but affected the Company's required disclosures.

#### Pending New Accounting Standards

In June 2016, the FASB approved ASU 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The main objective of the ASU is to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. To achieve this objective, the amendments in the ASU replace the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. In November 2019, the FASB approved ASU 2019-10 which delayed the effective date for ASU 2016-13 for smaller public business entities. The ASU is effective for the Company for the fiscal year beginning after December 15, 2022, and including interim periods within this fiscal year. Early adoption is permitted for the fiscal year beginning after December 15, 2018, including interim periods within this fiscal year. The Company is currently evaluating the impact of ASU 2016-13 on the consolidated financial statements.

In August 2018, the FASB approved ASU 2018-13, Fair Value Measurement: Disclosure Framework – Changes to Requirements for Fair Value Measurements. This guidance removes, modifies, and adds certain disclosure requirements on fair value measurements. This guidance is effective for annual reporting periods beginning after December 15, 2019, including interim periods within this fiscal year. The guidance has no impact on the Company's Consolidated Financial Statements and is not expected to have a material impact on the Company's required disclosures.

#### Note 2: Restriction on Cash and Amounts Due from Banks

The Bank is required to maintain average balances on hand or with the Federal Reserve Bank. At December 31, 2019 and 2018, the reserve balance amounted to \$1,697,000 and \$1,522,000, respectively.

### Note 3: Securities

The amortized cost and fair value of securities, with gross unrealized gains and losses, follows:

	December 31, 2019							
		ortized cost	Gross Unrealized Gains		Gross Unrealized Losses			Fair alue
Securities available for sale:								
Securites available for sale.								
Debt securities:								
Residential mortgage-backed - agency	\$	87	\$	-	\$	-	\$	87
Securities held to maturity: Debt securities:								
Residential mortgage-backed - agency	\$	10	\$	-	\$	_	\$	10
			Γ	December	r 31, 2	018		
			C	iross	G	iross		
	Amo	ortized	Unrealized		Unrealized		Fair	
	C	Cost	0	Gains		osses	V	alue
Securities available for sale: Debt securities:								
Residential mortgage-backed - agency	\$	107	\$	-	\$	_	\$	107
Securities held to maturity: Debt securities:								
Residential mortgage-backed - agency	\$	12	\$	-	\$	_	\$	12

The Company did not hold any securities of a single issuer, payable from and secured by the same source of revenue or taxing authority, the book value of which exceeded 10% of stockholders' equity at December 31, 2019.

Expected maturities may differ from contractual maturities in mortgage-backed securities because the mortgages underlying the securities may be prepaid without any penalties, therefore, a presentation of these securities into maturity categories is not presented.

At December 31, 2019 and 2018, there were no securities with a gross unrealized loss.

# Note 4: Loans

The following table presents a comparative composition of net loans as of December 31, 2019 and 2018:

	December 31, 2019	December 31, % of Total 2019 Loans		% of Total Loans
First mortgage loans

The following tables present the recorded investment in non-accrual loans by class of loans as of December 31, 2019 and 2018:

The Company utilizes an internal asset classification system in order to identify problem and potential problem loans. The loans selected for review under this rating system include 1-4 family non-owner-occupied residential loans, mortgage loans secured by other properties, construction loans and commercial loans where the loan balance was \$100,000 or greater when the loan was originated and 1-4 family owner-occupied residential loans and consumer loans where the loan balance was \$484,350 or greater for 2019 and \$453,100 or greater for 2018 determined when the loan was originated. Under the risk rating system, the Company classifies problem and potential problem loans as "special mention", "substandard", and "doubtful" which correspond to risk ratings five, six and seven, respectively. Substandard loans that have a risk rating of six include those characterized by the distinct possibility the Company may sustain some loss if the deficiencies are not corrected. Loans classified as doubtful, or risk rated seven, have all the weaknesses inherent in those classified substandard with the added characteristic the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Loans that do not expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses that deserve management's close attention are deemed to be special mention, having a risk rating of five. Loans reviewed under the internal asset classification system which are not considered a problem or potential problem loan are classified as "pass" and are those loans with a risk rating of one, two, three or four. Risk ratings are updated any time the facts and circumstances warrant.

Loans with an original loan balance under the thresholds for selection for review under the internal asset classification system are also evaluated on a case-by-case basis and assigned to a classification (special mention, substandard or doubtful) when they become non-performing, which is generally 90 days past due.

The following tables include total loans presented by the risk category of those loans evaluated by internal asset classification based on the most recent analysis performed and the contractual aging, and those not rated as of December 31, 2019 and 2018:

	December 31, 2019

Consumer		113		5		-
Total loans	\$	639	\$	31	\$	20

Impaired loans as of December 31, 2019 and 2018 included one consumer secured loan totaling \$61,000 and \$64,000, respectively, that was modified as a troubled debt restructuring ("TDR") during 2010. The loan was renewed during 2010 at a below market interest rate. This loan was not in default of the modified terms as of December 31, 2019 or December 31, 2018. Impaired loans at December 31, 2019 and December 31, 2018 also included one consumer loan totaling \$45,000 at and \$47,000, respectively, that was modified as a TDR in November 2013. The loan was also renewed at a below market interest rate. This loan was not in default of the modified terms at December 31, 2019 or December 31, 2018.

#### Note 5: Servicing

Loans serviced for others are not included in the accompanying consolidated balance sheets. The unpaid principal balances of mortgage loans serviced for others were approximately \$94,212,000 and \$91,621,000 at December 31, 2019 and 2018, respectively.

The aggregate carrying value of capitalized mortgage servicing rights at December 31, 2019 and 2018 totaled \$797,000 and \$761,000, respectively.

Custodial escrow balances maintained in connection with the foregoing loan servicing, and included in demand deposits, were approximately \$119,000 and \$112,000 at December 31, 2019 and 2018, respectively.

#### **Note 6: Premises and Equipment**

A summary of the cost and accumulated depreciation of premises and equipment follows:

	December 31,			
		2019	2018	
Land	\$	1,545	\$	1,545
Building and improvements		6,088		6,088
Furniture and equipment		4,660		4,571
		12,293		12,204
Accumulated depreciation		(8,441)		(8,114)
Net premises and equipment	\$	3,852	\$	4,090

Depreciation expense for the years ended December 31, 2019 and 2018 amounted to \$327,000 and \$367,000, respectively.

# Note 7: Deposits

Time deposits in denominations of \$250,000 or more were \$635,000 on December 31, 2019 and \$503,000 on December 31, 2018.

At December 31, 2019, the scheduled maturities of time deposits are as follows:

2020	\$ 10,662
2021	1,642
2022	370
2023	643
2024	-
Thereafter	-
Total	\$ 13,317

# Note 8: Federal Home Loan Bank Advances

There were no Federal Home Loan Bank advances outstanding at December 31, 2019 or December 31, 2018. Mortgage loans totaling \$34,755,000 at December 31, 2019 were available to secure Federal Home Loan Bank advances. Advances are subject to restrictions or penalties in the event of prepayment.

# Note 9: Income Taxes

Allocation of federal and state income taxes between current and deferred portions is as follows:

	Years Ended December 31,			ber 31,
	2	019	2	018
Current tax provision:				
Federal	\$	417	\$	269
State		205		133
		622		402
Deferred tax expense (benefit):				
Federal		6		17
State		3		9
		9		26
Income tax expense	\$	631	\$	428

The reasons for the differences between the statutory federal income tax rate and the effective tax rates are summarized as follows:

	Years Ended December 31,			
	2	019	2	018
Computed at the statutory rate (21%)	\$	441	\$	290
Increase resulting from:				
State income taxes		164		112
Other		26		26
Income tax expense	\$	631	\$	428

The components of the net def	ferred tax asset, included in	other assets, are as follows:
1	,	,

	December 31,			,
	2	2019	2	2018
Deferred tax assets				
Allowance for loan losses	\$	269	\$	269
Deferred compensation		281		279
Postretirement benefit obligations		597		503
Reductions in recorded balance of other real estate				
owned properties due to decline in estimated values		4		9
Reserve for loss on unfunded commitments		11		11
Reserve for losses on debit card transactions		5		4
Interest on nonaccrual loans		37		8
Deferred insurance agency commissions		2		1
Other		-		4
		1,206		1,088
Deferred tax liabilities				
Federal Home Loan Bank Stock		(16)		(17)
Depreciation		(162)		(199)
Mortgage servicing rights		(227)		(217)
Prepaid expenses		(51)		(33)
Deferred loan costs		(30)		(25)
Other		(4)		_
		(490)		(491)
		<u> </u>		
Net deferred tax asset	\$	716	\$	597

Retained earnings include approximately \$4,300,000 for which no deferred income tax liability has been recognized. This amount represents an allocation of income to bad debt deductions as of December 31, 1987 for tax purposes only. Reduction of amounts so allocated for purposes other than tax bad debt losses or adjustments arising from carryback of net operating losses would create income for tax purposes only, which income would be subject to the then-current corporate income tax rate. The unrecorded deferred income tax liability on the above amount was approximately \$1,226,000.

#### **Note 10: Off-Balance Sheet Activities**

# Credit-Related Financial Instruments

The Company is a party to credit related financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Company's exposure to credit loss is represented by the contractual amount of these commitments. The Company follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2019 and 2018, the following financial instruments were outstanding whose contract amounts represent credit risk:

	Contract Amount			
	2019		2018	
Commitments to grant loans	\$	2,700	\$	4,294
Unfunded commitments under lines of credit	ψ	13,209	Ψ	11,594
Standby letters of credit		10		10

Commitments to grant loans are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer. Mortgage loans in the process of origination are included in commitments to grant loans and represent amounts that the Bank plans to fund within a normal period of 60 to 90 days, and which are intended for sale to investors in the secondary market. Total mortgage loans held for sale amounted to \$647,000 at December 31, 2019. There were no loans held for sale as of December 31, 2018.

Unfunded commitments under lines of credit are commitments for possible future extensions of credit to existing customers. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management's credit evaluation of the customer.

Standby letters of credit are conditional lending commitments issued by the Company to guarantee performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Company generally holds collateral supporting those commitments. The Company had no deferred revenue under standby letters of credit at December 31, 2019 or December 31, 2018.

# Other Credit Risks

The Company has a concentration of funds on deposit with the Federal Reserve Bank totaling \$59,979,000 and \$49,956,000 at December 31, 2019 and 2018, respectively. The Company also has a concentration of funds on deposit with the Federal Home Loan Bank totaling \$6,667,000 and \$7,446,000 at December 31, 2019 and 2018, respectively.

## Note 11: Legal Contingencies

Various legal claims also arise from time to time in the normal course of business which, in the opinion of management, will have no material effect on the Company's consolidated financial statements.

#### Note 12: Minimum Regulatory Capital Requirements

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the following table) of common equity Tier 1 capital, total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of December 31, 2019 and 2018, that the Bank meets all capital adequacy requirements to which it is subject.

As of December 31, 2019, the most recent notification from the Comptroller of the Currency categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum common equity Tier 1 capital, total risk-based, Tier I risk-based and Tier I leverage ratios as set forth in the following tables. There are no conditions or events since that notification that management believes have changed the Bank's category. The Bank's actual capital amounts and ratios as of December 31, 2019 and 2018 are also presented in the table.

			December	31, 2019		
	Actu		Minin Capi Require	tal	To Be Capitalize Prompt Co Action Pro	d Under prrective
		Ratio	•	Ratio		Ratio
Common Equity Tier 1 Capital to Risk Weighted	Amount	Katio	Amount	Katio	Amount	Katio
Assets (CET1)	\$ 17,424	21.1%	\$ 3,725	4.5%	\$ 5,380	6.5%
Tier 1 Capital to Risk Weighed Assets Total Capital to Risk	17,424	21.1%	4,966	6.0%	6,622	8.0%
Weighed Assets Tier 1 Capital to	18,406	22.2%	6,622	8.0%	8,277	10.0%
Average Assets	17,424	10.3%	6,795	4.0%	8,493	5.0%
			December	31, 2018		
	Actu	ıal	Minin Capi Require	tal	To Be Capitalized Prompt Co Action Pro	d Under prrective
	Amount	Ratio	Amount	Ratio	Amount	Ratio
Common Equity Tier 1 Capital to Risk Weighted	Thount					
Assets (CET1)	\$ 16,795	20.5%	\$ 3,685	4.5%	\$ 5,321	6.5%
Tier 1 Capital to Risk Weighed Assets Total Capital to Risk	16,795	20.5%	4,913	6.0%	6,551	8.0%
Weighed Assets	1	21 70/	( 551	8.0%	8,189	10.0%
Tier 1 Capital to	17,778	21.7%	6,551	8.070	0,109	10.070

The above minimum capital requirements exclude the capital conservation buffer required to avoid limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers. The capital conservation buffer is being phased in from 0.0% for 2015 to 2.50% by 2019. The capital conservation buffer was 2.50% and 1.875% at December 31, 2019 and 2018, respectively.

The Bank is subject to certain restrictions on the amount of dividends that it may declare without prior regulatory approval. At December 31, 2019, the Bank had \$1,224,000 in retained earnings available for dividend declaration without prior regulatory approval.

# Note 13: Employee Benefit Plans

#### 401(k) Plan

The Company adopted a 401(k) Plan, effective January 1, 2016 which covers substantially all Company employees. The plan qualifies under Section 401(a) of the Internal Revenue Code and allows employees to contribute up to 75% of their salary on a pretax or after tax basis. The Company contributes an amount equal to 3% of each eligible participant's salary, even if an employee elects not to defer any of their own salary into the plan ("safe harbor contribution"). The Company can

also elect to contribute discretionary amounts at any time. Each participant may direct the investment of their own contributions and the Company's contributions to a variety of funds offered and maintained by the trustee of the plan. The Company's expense for the plan was \$100,000 and \$94,000 for the years ended December 31, 2019 and 2018, respectively.

#### Deferred Compensation Plan

The Company also sponsors a deferred compensation plan for participating directors for the deferral of director fees. The interest accrued on the deferred compensation liability was \$5,000 and \$5,000 for the years ended December 31, 2019 and 2018, respectively. The deferred compensation liability, which is included in other liabilities, was \$984,000 and \$979,000 at December 31, 2019 and 2018, respectively.

#### Note 14: Postretirement Plan

The Company has an unfunded noncontributory defined benefit postretirement health and dental care plan covering all employees who meet the eligibility requirements. The Company's funding policy is to make the minimum annual contribution that is required by applicable regulations, plus such amounts as the Company may determine to be appropriate from time to time.

The Company uses a December 31 measurement date for the plan. Information about the plan's funded status and health and dental care cost follows:

	 2019	2018
Change in projected benefit obligation		
Beginning of year	\$ 1,765	\$ 1,777
Service cost	44	48
Interest cost	74	73
Actuarial (gain) loss	276	(73)
Benefits paid	 (65)	 (60)
	\$ 2,094	\$ 1,765

	December 31,				
	2019			2018	
Fair value of plan assets	\$	-	\$	_	
Benefit obligation		(2,094)		(1,765)	
Funded status at end of year	\$	(2,094)	\$	(1,765)	

	December 31,			1,
		2019	2018	
Amounts recognized on balance sheet consist of: Accrued liability (included in other liabilities) Unrecognized net actuarial gain (loss) and prior service cost, net of tax (included in accumulated other comprehensive	\$	(2,094)	\$	(1,765)
income (loss))		(339)		(19)
	Ye	ars Ended 1	Decei	mber 31,
		2019		2018
Components of net periodic benefit cost				
Service cost	\$	44	\$	48
Interest cost		74		73
Amortization of prior service cost		(211)		(211)
Amortization of net loss		40		47
Net periodic benefit (income) cost	\$	(53)	\$	(43)

Service cost is included in Salaries and employee benefits on the Consolidated Statement of Income. All other components of net periodic benefit cost are included in Other noninterest expense on the Consolidated Statement of Income.

The Company's assumptions used to determine the benefit obligation and benefit cost were:

-	2019	2018
Discount rate used to determine benefit obligation	3.10%	4.25%
Discount rate used to determine benefit cost	4.25%	4.15%
Health care trend rates:		
Medical trend rate used to determine benefit obligation	8.00%	9.00%
Medical trend rate used to determine benefit cost	9.00%	9.00%
Ultimate medical trend rate used to determine benefit obligation	4.50%	5.00%
Ultimate medical trend rate used to determine benefit cost	5.00%	5.00%
Year rate reaches ultimate trend rate	2027	2026
Dental care trend rates:		
Medical trend rate	4.00%	4.00%
Ultimate medical trend rate	3.00%	3.00%
Year rate reaches ultimate trend rate	2023	2022

The discount rate decreased from 4.25% to 3.10% to reflect the current market conditions as of the measurement date. This change resulted in an increase in accumulated projected benefit obligation.

At December 31, 2019, the projected benefits to be paid are as follows:

2020	\$ 66
2021	67
2022	68
2023	76
2024	63
2025-2029	429

For the year ended December 31, 2020, the projected net periodic benefit income is \$32,000.

On December 8, 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the "Act") was signed into law. The Act introduces a prescription drug benefit under Medicare Part D, as well as a federal subsidy to sponsors of retiree health care benefit plans that provide benefits at least actuarially equivalent to Medicare Part D.

In accordance with ASC 715, *Employers' Accounting for Postretirement Benefits Other Than Pensions*, the Company has not reflected the effects of the Act on the measurements of plan benefit obligations and periodic benefit costs and accompanying notes because the Company is unable to conclude whether the benefits provided by the plan are actuarially equivalent to Medicare Part D under the Act.

## **Note 15: Related Party Transactions**

In the ordinary course of business, the Company has granted loans to executive officers, directors, and their affiliates (related parties). Activity associated with loans made to related parties for the years ended December 31, 2019 and December 31, 2018 is as follows:

	Years Ended December 31,				
	2019			2018	
Balance at beginning of year	\$	889	\$	1,020	
Changes in composition of related parties		-		(51)	
New loans and advances		933		632	
Repayments, including loans sold		(1,051)		(712)	
Balance at end of year	\$	771	\$	889	

In management's opinion, such loans and other extensions of credit were made in the ordinary course of business and were made on substantially the same terms (including interest rates and collateral) as those prevailing at the time for comparable transactions with other persons. Further, in management's opinion, these loans did not involve more than normal risk of collectibility or present other unfavorable features.

Deposits from related parties held by the Company at December 31, 2019 and December 31, 2018 totaled \$1,610,000 and \$1,442,000, respectively.

#### **Note 16: Fair Value Measurements**

The fair value standard defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The standard requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, the standard establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

<u>Securities available for sale (recurring)</u>: The fair value of the Company's securities available for sale are determined using Level 2 inputs, which are derived from readily available pricing sources and third-party pricing services for identical or comparable instruments, respectively. There were no transfers between Level 1 and Level 2.

<u>Impaired loans (non-recurring)</u>: Impaired loans are evaluated and valued at the time the loan is identified as impaired, at the lower of cost or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. Collateral may be real estate and/or business assets including equipment, inventory and/or accounts

receivable. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the customer and customer's business. When the fair value of the collateral is based on an observable market price, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

<u>Other real estate owned (non-recurring)</u>: Other real estate owned properties are adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, foreclosed assets are carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3.

#### Assets at Fair Value on a Recurring Basis

The following table summarizes assets and liabilities measured at fair value on a recurring basis as of December 31, 2019 and 2018, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value.

	December 31, 2019

#### Assets Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets and liabilities at fair value on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period.

#### Collateral-Dependent Impaired Loans and Foreclosed Assets

The estimated fair value of collateral-dependent impaired loans and foreclosed assets is based on the appraised fair value of the collateral, less estimated costs to sell. Collateral-dependent impaired loans and foreclosed assets are classified within Level 3 of the fair value hierarchy.

The Company considers the appraisal or a similar evaluation as the starting point for determining fair value and then considers other factors and events in the environment that may affect the fair value. Appraisals or a similar evaluation of the collateral underlying collateral-dependent loans and foreclosed assets are obtained when the loan is determined to be collateral-dependent for impaired loans and at the time a loan is transferred to foreclosed assets. Appraisals or similar evaluations are obtained subsequently as deemed necessary by management but at least annually on foreclosed assets. Appraisals are reviewed for accuracy and consistency by management. Appraisals are performed by individuals selected from the list of approved appraisers maintained by management. The appraised values are reduced by discounts to consider lack of marketability and estimated costs to sell. These discounts and estimates are developed by management by comparison to historical results.

Assets measured at fair value on a nonrecurring basis and related impairment losses are included in the table below.

				Γ	ecemb	er 31, 20	19

#### Note 17: Disclosures about Fair Values of Financial Instruments

The following table presents estimated fair values of the Company's financial instruments. Fair value is determined under the framework discussed in note 16. The fair values of certain of these instruments were calculated by discounting expected cash flows, which involves significant judgments by management and uncertainties. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company does not know whether the fair values shown below represent values at which the respective financial instruments could be sold individually or in the aggregate.

	Decembe	er 31, 2019	December 31, 2018		
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
